Best Phone:	801-598-8709
Best Time:	8 AM - 10 PM

### Rules of Conduct

A wounded deer is a "tagged" deer, hunt is over

### Promontory Point CWMU Description

The Promontory Point CWMU is located on the very south end of the Promontory Mountains, three sides of the Unit are surrounded by Great Salt Lake water. The Promontory Mountains start at 5500 feet elevation in the south, then drop into Little Valley, 5000 feet elevation. Then increase to **6800 feet** before decreasing again. On the east side the Promontory Mountains are cut by Maple Canyon, **4200 feet** to 5000 feet and Cellar Canyon, 4200 feet to 5400 feet elevation. On the west side. Long Canyon, 4200 feet to 6200 feet; and Brushy Canyon, 5400 feet to 5800 feet, cut the mountains.

Over seventy percent of the Promontory Point Cooperative Wildlife Management Unit (CWMU) is a combination of Inter-Mountain Basins **Big Sagebrush Shrubland** (48), Great Basin **Pinyon-Juniper** (37), and **Invasive Annual Grassland** (121). Invasive Annual Grasslands and Big Sage-brush Shrubland are at the lower elevations, and Pinyon-Juniper are at the higher elevations. There are areas of Inter-Mountain Basins **Semi-Desert Grassland** (76) and areas of **Invasive Annual and Biennial Forbland** (122). Nearer the Great Salt Lake are areas of Inter-Mountain Basins **Greasewood Flat** and Great Basin Xeric **Mixed Sagebrush Shrubland** (49). In the middle of the unit is an area of Recently **Mined or Quarried** land cover.
